Re: David Engineering & Construction, Inc.  
JCC Technical College Project

To Whom It May Concern:

It is a pleasure to offer this letter of recommendation on behalf of David Engineering & Construction, Inc. for their performance on the construction of the new JCC Technical College in Shelbyville, Kentucky. The JCC Technical College is a new school which David Engineering & Construction, Inc. recently completed for the Kentucky State Finance and Administration Cabinet. The end user is the Kentucky Community and Technical College System (KCTCS).

Their overall performance on the project was outstanding.

The project had an aggressive schedule for the beginning, however, David Engineering & Construction, Inc. provided an experienced, knowledgeable project management staff and a complement of good subcontractors that overcame considerable unforeseen site impacts and completed the project on time. Staff, students and parents were pleasantly surprised at the building opening on time and the quality of the construction.

The opening of the new JCC Technical College was a huge success with the help of David Engineering & Construction, Inc. and I look forward to working with them again in the future.

Sincerely,

  
J. Richard Kremer, FAIA  
President
